

TANK CLEANER

PRINCIPAL FUNCTIONING AGENTS

Anionic surfactants, chelating agents and ammonia	100.0%
TOTAL.....	100.0%

TANK CLEANER

KEEP OUT OF REACH OF CHILDREN DANGER

Eye contact with product will cause burns and irritation. Avoid eye contact with product at all times. Effects of skin contact may include burns and irritation. Avoid prolonged and unnecessary skin contact with product. May cause burning pain in mouth, throat and abdomen and coughing and constriction of the throat, followed by nausea, vomiting, and diarrhea. Do not taste or swallow product. May cause respiratory tract irritation, coughing, and difficulty breathing.

FIRST AID	
IF SWALLOWED:	<ul style="list-style-type: none"> • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes.
IF INHALED:	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.
IF IN EYES:	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.
<p>Call a poison control center or doctor immediately for treatment advice. Have the product container with you when calling a poison control center or doctor, or going for treatment.</p>

TANK CLEANER

GENERAL INFORMATION

TANK CLEANER is an alkaline, ammoniated spray equipment cleaner that helps to dissolve active ingredient residue and to prevent cross contamination between tank mixtures. TANK CLEANER is safe to use on hoses, nozzles, induction tanks and meets the standards of the active ingredient labels that recommend spray equipment cleaning.

DIRECTIONS FOR USE

Follow the cleaning instructions of the equipment manufacturer and the active ingredient label. If the manufacturer's instructions are not available, use the following method:

- Clean as soon as possible after field use.
- Clean equipment near an area where the rinsate can be safely disposed.
- To prevent cross contamination between tank mixes, focus on cleaning all parts of the spray equipment, surfaces and measuring gear.
- Strainers should be inspected for clogs that can create pressure variability and spraying inaccuracy.
- Wear the same PPE as required by the most restrictive label.

For small tanks such as backpack sprayers:

Add about 1 ounce of TANK CLEANER for each gallon of water. Shake sprayer to cover all surfaces several times. Pour out water and repeat as needed. Rinse several times with fresh water until all signs of cleaning agent, such as foaming, are gone.

For large tanks:

Use about 1 quart TANK CLEANER per 400 gallons of water. Hard-to-eliminate residues, such as 2,4-D or dicamba may require increased amounts of TANK CLEANER, overnight soaking or repeated rinsing to completely eliminate these stubborn residues. Add rinse water, then tank cleaner, at an amount adequate for cleaning. Turn on circulation and allow to run for 10 to 15 minutes and then purge hoses, lines screens and nozzles for at least one minute or remove and clean separately. After cleaning, empty the system and completely flush all components with water.

HARD TO CLEAN RESIDUES AND RINSATE TESTING: Some residues, such as those from 2,4-D and dicamba, may be hard to remove. Carryover of these actives could injure certain crops if not thoroughly removed. It is recommended after cleaning that the rinse water be tested on sensitive plants to make sure enough residue has been removed. Apply rinse water directly to plants and observe for wilting or other stress. If damage occurs, repeat the cleaning process and retest.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. Do not contaminate water, food or feed by storage or disposal of this product. Do not store in mild steel or aluminum containers. Do not store near strong oxidizers. For optimal storage, store between 40° and 90°F.

Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
